

PROBLEM

profit and losses of airlines in flight delay prediction

Chaya devi

Flight delay is inevitable and it plays an important role in both profits and loss of the airlines.

Sathana

Measured precision,accuracy,sensitivity,recall and F-measure of the three models on two cases.

Sandhiyalakshmi

The destination delay is highly dependent to arrival fights and the effective factors include; day,time,airport capacity and some factors.

Madhumitha

The design of learning technology is taken from human neural network learning is a branch of machine.

Abinaya

The drawback is the noise of input data.The researcher neglects the noise during prediction.
